

In the Claims:

Please modify claim 49 and add claim 50 as follows:

1 – 20 (canceled)

21. (previously presented) A kit comprising the combination of a container, at least one work piece, at least one utensil, and a colorant, wherein said container includes an inner cavity, an exterior, an opening in a wall of said container and a funnel connected to said opening to provide communication between said inner cavity and the exterior of said container, and wherein said work piece, said utensil, and said colorant are at least partially removably contained within said container.
22. (previously presented) The kit of claim 21 wherein said work piece defines at least one work piece of the following group of work pieces consisting of a colorable work piece, a substantially egg shaped work piece, an edible work piece, a substantially egg shaped edible work piece, and an egg, and wherein said utensil defines at least one utensil of the following group of utensils consisting of a brush, a spoon, a wire egg dipper, a pair of tongs, and a straw, and wherein said colorant defines at least one colorant of the following group of colorants consisting of a predetermined quantity of powdered colorant, a discrete unit of colorant concentrate, and a colorant pill defining a colorant powder concentrate enclosed within a liquid soluble container.
23. (previously presented) The kit of claim 22 wherein said container defines a transparent container.
24. (previously presented) The kit of claim 22 wherein said container defines a container comprising a first member and a second member and wherein said first member is sealingly and detachably engageable to said second member.
25. (previously presented) The kit of claim 22 wherein said container defines a container consisting of formed plastic sheet.

26. (previously presented) The kit of claim 22 wherein said container includes at least one liquid flow channel formed in a wall of said container.
27. (previously presented) The kit of claim 22 wherein said container resists the spillage of non-gaseous fluid contents of said container when said container is oriented in any orientation.
28. (previously presented) A kit comprising the combination of a container and at least one work piece substantially removably contained within said container wherein said container includes an inner cavity, an exterior, an opening in a wall of said container and a funnel connected to said opening to provide communication between said inner cavity and the exterior of said container, and wherein said work piece defines at least one work piece of the following group of work pieces consisting of a non-utensil colorable work piece, a substantially egg shaped work piece, an edible work piece, a substantially egg shaped edible work piece, and an egg.
29. (previously presented) The kit of claim 28 wherein said container defines a transparent container.
30. (previously presented) The kit of claim 28 wherein said container defines a container comprising a first member and a second member and wherein said first member is sealingly and detachably engageable to said second member.
31. (previously presented) The kit of claim 28 wherein said container defines a container consisting of formed plastic sheet.
32. (previously presented) The kit of claim 28 wherein said container includes at least one liquid flow channel formed in a wall of said container.

33. (previously presented) The kit of claim 28 wherein said container resists the spillage of non-gaseous fluid contents of said container when said container is oriented in any orientation.
34. (previously presented) A kit comprising the combination of a container and at least one utensil at least partially removably contained within said container wherein said container includes an inner cavity, an exterior, an opening in a wall of said container and a funnel connected to said opening to provide communication between said inner cavity and the exterior of said container, and wherein said utensil defines at least one utensil of the following group of utensils consisting of, a spoon, a wire egg dipper, a pair of tongs, a straw.
35. (previously presented) The kit of claim 34 wherein said container defines a transparent container.
36. (previously presented) The kit of claim 34 wherein said container defines a container comprising a first member and a second member and wherein said first member is sealingly and detachably engageable to said second member.
37. (previously presented) The kit of claim 34 wherein said container defines a container consisting of formed plastic sheet.
38. (previously presented) The kit of claim 34 wherein said container includes at least one liquid flow channel formed in a wall of said container.
39. (previously presented) The kit of claim 34 wherein said container resists the spillage of non-gaseous fluid contents of said container when said container is oriented in any orientation.
40. (previously presented) A kit comprising the combination of a container and colorant contained within said container wherein said container includes an inner cavity, an exterior, an opening in a wall of said container and a funnel connected to said opening to provide

communication between said inner cavity and the exterior of said container, and wherein said colorant defines at least one colorant of the following group of colorants consisting of a discrete unit of dye concentrate, a predetermined quantity of colorant powder, and a colorant pill defining a colorant powder concentrate enclosed within a liquid soluble container.

41. (previously presented) The kit of claim 40 wherein said container defines a transparent container.
42. (previously presented) The kit of claim 40 wherein said container defines a container comprising a first member and a second member and wherein said first member is sealingly and detachably engageable to said second member.
43. (previously presented) The kit of claim 40 wherein said container defines a container consisting of formed plastic sheet.
44. (previously presented) The kit of claim 40 wherein said container includes at least one liquid flow channel formed in a wall of said container.
45. (previously presented) The kit of claim 40 wherein said container resists the spillage of non-gaseous fluid contents of said container when said container is oriented in any orientation.
46. (previously presented) A kit comprising the combination of a container, at least one work piece, at least one utensil, and a colorant, wherein said container includes an inner cavity, an exterior, an opening in a wall of said container and a funnel connected to said opening to provide communication between said inner cavity and the exterior of said container and wherein said container includes a plurality of liquid flow channels formed in a wall of said container and wherein said container resists the spillage of non-gaseous fluid contents of said container when said container is oriented in any orientation, and wherein said work piece, said utensil, and said colorant are at least partially removably contained within said container, and wherein said work piece defines at least one work

piece of the following group of work pieces consisting of a colorable work piece, a substantially egg shaped work piece, an edible work piece, a substantially egg shaped edible work piece, and an egg, and wherein said utensil defines at least one utensil of the following group of utensils consisting of, a spoon, a wire egg dipper, a pair of tongs, a straw, and wherein said colorant defines at least one colorant of the following group of colorants consisting of a discrete unit of colorant concentrate, a predetermined quantity of colorant powder, and a colorant pill defining a colorant powder concentrate enclosed within a liquid soluble container.

47. (previously presented) A kit comprising the combination of a container and a utensil, wherein said container includes an inner cavity, an exterior, an opening in a wall of said container, and a non annular funnel connected to said opening to provide communication between said inner cavity and the exterior of said container, and wherein said utensil is at least partially removably contained within said container.
48. (previously presented) The kit of claim 47 wherein a funnel axis is defined as running substantially from the center of said opening in said wall to substantially the center of an opening in said funnel located within said container, and wherein a cross-sectional shape of said funnel in a position substantially normal to said funnel axis defines a cross-sectional shape having a first breadth dimension and a second breadth dimension and wherein said first breadth dimension is greater than said second breadth dimension, and wherein said utensil defines at least one utensil of the following group of utensils consisting of a brush, a spoon, a wire egg dipper, a pair of tongs, and a straw.
49. (previously presented) A kit comprising a container having an inner cavity and an opening in a wall of said container, said opening having a funnel connected to said opening to provide communication between said inner cavity and an exterior of said container, and a an edible article removably contained within said container.
50. (new) A kit comprising a container having an inner cavity and an opening in a wall of said container, said opening having a funnel connected to said opening to provide communication between said inner cavity and an exterior of said container, at least one

utensil at least partially removably contained within said container, said utensil having a substantially elongated handle portion and an open loop portion, and edible matter removably contained within said container.

51. (new) The kit of claim 51 wherein said utensil defines a wire egg dipper.
